

# IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Application of:

Date: April 1, 2004

MICHAEL JOHN CULLEN and RALPH WAYNE CUNNINGHAM

Serial No. : 10/751,079

Filed : January 2, 2004

For : VEHICLE TRAJECTORY CONTROL SYSTEM

Commissioner for Patents

P.O. Box 1450

Alexandria, Virginia 22313-1450

Sir:

# INFORMATION DISCLOSURE STATEMENT UNDER 37 C.F.R. §§ 1.56, 1.97, and 1.98

Applicants are submitting this Information Disclosure
Statement pursuant to 37 C.F.R. §§ 1.56, 1.97, and 1.98 to
disclose to the U.S. Patent and Trademark Office the patents,
publications, applications, and/or other references listed on
the enclosed, completed PTO-1449 form(s). The filing of this
Information Disclosure Statement should not be construed as a
representation that a search has been made or as an admission
that the listed references are prior art for this application.
Applicants respectfully request that the listed references be
expressly considered during prosecution of the application, and
that the references be made of record therein and appear among
the "references cited" on any patents issuing therefrom.

## CONTENT OF DISCLOSURE

This Information Disclosure Statement includes (1) 1 page of PTO-1449 forms, and (2) a legible copy of each foreign and non-patent reference, if any, listed on the form. However, because this application was filed on or after July 1, 2003, no

Page 1 - INFORMATION DISCLOSURE STATEMENT . . Serial No. 10/751,079; FGT 321CIP

copies of U.S. patents or published U.S. patent applications are included.

#### FOREIGN-LANGUAGE REFERENCES

A concise explanation of the relevance of each listed reference not in the English language follows:

German Patent No. 3918254: This patent purports to disclose a method is described for preventing load cycle shocks due to abrupt changes of the accelerator pedal position in motor vehicles, especially passenger motor vehicles, which are equipped with an internal combustion engine (1), a transmission (5) and a clutch (3), arranged between the internal combustion engine and the transmission and controllable in respect of its transmittable torque. In order to prevent the load shocks when the accelerator pedal (12) is adjusted from an overrun position into a load position, it is proposed that the clutch (3) be automatically forced out of an engaged position assigned to the overrun position of the accelerator pedal, with a predefinable slip between the speed of the internal combustion engine (1, 2) and of the transmission input (4), in the engaging direction for the transmission of a continuously increasing torque. In the case of an adjustment of the accelerator pedal (12) from a load position into an overrun position on the other hand, it is proposed that the clutch (3) automatically be fully disengaged first before the internal combustion engine (1) changes from traction into overrun conditions and then actuated in the engaging direction again until a predefinable slip is attained between the speed of the internal combustion engine (1, 2) and that of the transmission input (4).

Japan Patent No. 03 288,056: This patent purports to disclose to prevent generation of judder by delaying lowering of corresponding line pressure at the time of detecting any sudden closing state of an accelerator by an accelerator sudden closing

state detecting means, thereby preventing the clutch transfer capacity from becoming lower than engine torque.

A control unit 43 reads throttle opening TH from a sensor 44, computes the rate of change DELTATH to time, and makes a comparison on whether the rate of change is smaller than the limit rate of change -alpha. In the case of DELTATH<-alpha, this means the sudden closing time of a throttle valve, so that the control unit 43 computes the converter speed ratio gamma of a torque converter 3; and when the converter speed ratio gamma is smaller than the stall limit value beta, this means the stalling state, so that the control unit 43 performs line pressure lowering delay control for delaying the lowering of line pressure in order to prevent generation of judder.

# TIMING OF DISCLOSURE / STATEMENT / FEE INFORMATION

This Information Disclosure Statement is being filed either (1) within three months of the filing date of a national application other than a continued prosecution application under 37 C.F.R. § 1.53(d), or (2) within three months of the date of entry of the national stage as set forth in 37 C.F.R. § 1.491 in an international application. Therefore, in accordance with 37 C.F.R. § 1.97(b), no fee or statement under 37 C.F.R. § 1.97(e) is required.

Please charge any cost incurred in the filing of this Information Disclosure Statement, along with any other costs, to Deposit Account No. 06-1510. If there are insufficient funds in this account, please charge the fees to Deposit Account No. 06-1505. A duplicate copy of this sheet is enclosed.

Please contact the undersigned with any questions or comments regarding this Information Disclosure Statement.

## CERTIFICATE OF MAILING

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450, on April 1, 2004.

This collection of information is required by 37 CFR 1.5. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.
